

**BELMONDO®**

*Horse walker S*  
*Horse walker P*

**Individual and tailor-made –  
suitable for all horse walkers!**

## Features

BELMONDO® rubber flooring is custom-made for all kinds of horse walkers. This makes BELMONDO® horse walkers fitting accurately and quick and easy to lay. The prerequisite for a BELMONDO® horse walker is a consolidated surface (such as concrete, asphalt, etc.)

BELMONDO® Horse walkers are available in two qualities:

**– Horse walker S**

a standard type for covered horse walkers

**– Horse walker P**

for open, unroofed horse walkers

The specially designed mat surface prevents horses from slipping under wet conditions. *Horse walker P* is protected against UV and ozone and can withstand direct sunlight for many years.

*Horse walker P* is electrically conductive and suitable for the year-round operation of the horse walker. Snow can simply be cleaned off the mat, which means your horse walker can be used anytime, even in winter.

Under icy conditions we recommend the use of magnesium.

As with all other BELMONDO® products, horses and owners benefit equally. Both types ensure elasticity, secure footing and slip resistance. BELMONDO® mats can be easily swept by hand or cleaned with a sweeping machine.

Horses walk on a comfortable surface that is safe and healthy for them. Although BELMONDO® mats are designed to prevent slipping, they still allow for the joints' necessary range of movement.

## Data

**BELMONDO®**  
*Horse walker S*

**Surface:**  
Horseshoe profile

**Underside:**  
Groove profile

**Material:**  
Rubber

**Dimensions:**  
Thickness 18 mm

**BELMONDO®**  
*Horse walker P*

**Surface:**  
Groove profile with negative hammer finish

**Underside:**  
Pimpled

**Material:**  
Rubber

**Dimensions:**  
Thickness 19 mm

All other measurements (length, width, interlocking) depend on the individual cut.

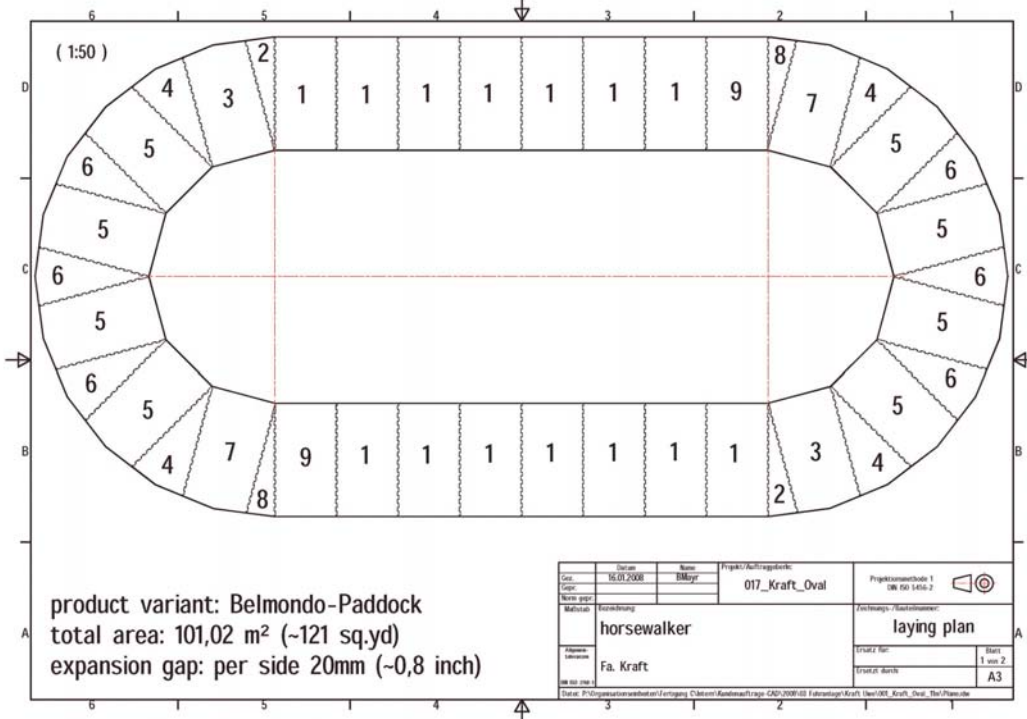

Thickness  $\pm 1$  mm. Length and width  $\pm 1.5$  % (DIN ISO 3302-1, tolerance class M 4). The tolerances also apply within the mat.
