

Standard Horse Walker (round) with Partial Roof, Eco model

No foundations!

Kraft ...keeps your horses fit!

Horses love roaming. In their natural environment they will cover up to 50 kilometers (30 miles) daily in search of food.

The health and vitality of a horse is directly linked to the amount of exercise it gets.

The partial roof (covering the walking surface) protects horses from wind and rain. The walker can therefore be used year-round.

 **Kraft** ...keeps your horses fit!
– from walk to gallop..

Standard Horse Walker (round) with Partial Roof, Eco model
